

Haozhe Lei

Ph.D. Candidate, Electrical and Computer Engineering | NYU WIRELESS

9th Floor, 370 Jay Street, Brooklyn, NY 11201 | hl4155@nyu.edu | [Homepage](#) | [Google Scholar](#)

RESEARCH PROFILE

RF sensing and probabilistic spatial intelligence for autonomous systems.

- **Core problem and inference:** I treat wireless localization as belief estimation, not point prediction: one multipath snapshot can support several transmitter positions and headings when antennas are directional or maps and digital twins are mismatched. I learn candidate-wise likelihoods, form calibrated spatial posteriors, and fuse observations.
- **World models and decisions:** Ray-tracing wireless digital twins provide imperfect structured priors; I align them to measurements through real-to-sim calibration and learn map- and pose-conditioned neural scores. Physics-informed sequential decisions connect RF evidence to navigation under partial observability.
- **System translation:** The program spans RF localization, robotic sensing and navigation, and validation on a 10-GHz FR3 platform. Complementary directions include UE-centric multi-band adaptation and vision-language-guided object-centric RGB-D spatial memory for embodied agents.

EDUCATION

New York University

Ph.D. in Electrical and Computer Engineering

Advisor: Prof. Sundeep Rangan, Director, NYU WIRELESS

Sept. 2022 – Expected May 2027

Fellowship: Ernst Weber Fellowship, 2023

New York University

M.S. in Computer Engineering

Sept. 2020 – May 2022

China Agricultural University

B.E. in Electrical Engineering and Automation

Sept. 2015 – Jun. 2019

RESEARCH EXPERIENCE

NYU WIRELESS, New York University

Graduate Research Assistant; Advisor: Prof. Sundeep Rangan

Brooklyn, NY, USA

Sept. 2022 – Present

- **Probabilistic RF localization and measurement-aligned wireless digital twins.** Lead end-to-end development of likelihood-based and neural posterior localization under sparse measurements and digital-twin mismatch, from problem formulation and algorithm design through implementation and evaluation. Methods include uncertainty calibration, Bayesian fusion, U-Net/attention spatial scoring, and measurement-aligned Sionna RT. Lead MAGNETAR from probabilistic formulation through RF-robot integration and experimental evaluation, combining multipath spatial posteriors with *MobiFR3* measurements for transmitter-pose inference. *Outputs:* IEEE GLOBECOM 2026; Asilomar 2026 (two papers); IEEE TVT manuscript under review; IEEE ICRA 2027 (two papers under review); IEEE TWC revision in preparation.
- **Wireless-aware robotic navigation: methods and experimental systems.** Lead *MobiFR3*, a heterogeneous 10-GHz FR3 robotic platform for localization experiments and SLAM-based navigation, integrating RF measurements with ROS 2 odometry, LiDAR/RGB sensing, and TurtleBot4 motion; Jackal integration is in progress. Direct system architecture, RF-robot synchronization, experiments, and evaluation while mentoring students in RF hardware operation and data collection. Earlier, co-developed physics-informed and program-guided reinforcement learning for zero-shot wireless indoor navigation. *Publications:* IEEE ICRA 2024; IEEE OJ-COMS 2025; and RLC IBRL Workshop 2025 (Spotlight).
- **UE-centric wireless digital twins for closed-loop multi-band adaptation.** Lead the research direction, problem formulation, digital-twin design, and learning methods for *MCMB-HDT*, spanning georeferenced propagation, multi-cell FR1/FR3 networks, handset arrays, and mobility. Develop Transformer-based sparse-history rate prediction and recurrent PPO for measurement-constrained array activation; mentor a junior researcher in model development, Sionna implementation, and evaluation. *Outputs:* IEEE ICC Workshops 2026; IEEE JSAC manuscript under review.

RESEARCH MENTORING

New York University

Feb. 2025 – Present

- **Ruibin Chen**, Ph.D. student

Feb. 2025 – Present

Mentor his research on *MCMB-HDT* and RF localization, including model development, Sionna implementation, and evaluation, within projects I lead. Joint work includes a peer-reviewed IEEE ICC Workshops 2026 paper and manuscripts under review at IEEE JSAC and IEEE ICRA 2027.

- **Yuhan Jiang**, M.S. student

Jul. 2026 – Present

Mentor research on RF hardware operation, calibration, and data acquisition for the FR3 robotic localization platform; co-author of *MAGNETAR*, under review at IEEE ICRA 2027.

- **Yuheng Liu and Ashesh Kaji**, M.S. students

2026 – Present

Mentor their joint project on object-centric RGB-D scene memory for embodied agents, including VLM-guided object proposals, depth-grounded 3D projection, cross-view association, and queryable scene representations for retrieval and localization. Yuheng joined in Jan. 2026; Ashesh joined in Jul. 2026.

ADDITIONAL RESEARCH EXPERIENCE

NYU C2SMARTER Center

Brooklyn, NY, USA

Research Assistant

Sept. 2023 – Mar. 2026

- Developed distributed online optimization, predictive camera control, and driver-risk-aware transportation digital twins for networked sensing and closed-loop urban mobility. Publications include IEEE Control Systems Letters (2026), IEEE T-ITS (2025), and *Transportation Research Part C* (2024).

NYU Center for Cybersecurity

Brooklyn, NY, USA

Research Assistant

Sept. 2021 – Jan. 2024

- Developed game-theoretic, neuro-symbolic, and adaptive-learning methods for autonomous driving, navigation security, and automated penetration testing. Publications include IEEE TIFS (2025), IEEE MILCOM (2024), and IEEE ICRA (2023).

TEACHING EXPERIENCE

Teaching Assistant, ECE-GY 5213 Introduction to System Engineering, New York University Spring 2024

TECHNICAL EXPERTISE AND EXPERIMENTAL SYSTEMS

- **Statistical inference and learning:** Likelihood and conditional-posterior estimation; Monte Carlo marginalization over latent position and orientation; multi-observation Bayesian fusion; calibration with proper scoring rules and empirical coverage; U-Net, attention, and Transformer models.
- **Sequential decision-making and optimization:** Physics-informed and neuro-symbolic reinforcement learning; PPO and recurrent actor-critic policies under partial observability; bandit learning; online meta-adaptation; distributed online convex optimization.
- **Wireless digital-twin simulation and calibration:** Sionna RT scene and trajectory design; TX/RX pose and mobility simulation; geometry, material, and pose variation; measured antenna-pattern integration; stochastic RF-chain and noise modeling; Wireless InSite simulation.
- **Robotics and multimodal sensing:** System architecture and experiment leadership for *MobiFR3*; ROS 2 integration with TurtleBot4, with Jackal UGV integration in progress; synchronized RF, odometry, LiDAR, and RGB observations for localization, SLAM, and navigation.
- **RF experimental systems:** Experiment design and supervision for 10-GHz FR3 RFSoc/PiRadio channel sounding with Sivers RF front ends, Vivaldi antennas, D48 pan-tilt actuation, and linear-track measurements; hands-on TI AWR1642/AWR6843 point-cloud acquisition and filtering for UAV trajectory extraction.
- **Scientific computing:** Python, MATLAB, R, Linux and shell scripting, LaTeX, Kubernetes; SUMO and CARLA for mobility and autonomous-driving simulation.

INDUSTRY EXPERIENCE

JD.com, Inc.

Algorithm Engineer Intern

Beijing, China

Jan. 2021 – Feb. 2021

- Developed CenterNet/PIoU-based rotated-object detection and supported integration and on-site validation in a manufacturing laboratory.

HONORS AND AWARDS

- Ernst Weber Fellowship, NYU Tandon School of Engineering, 2023
- Tandon Research Excellence Exhibit, *AI-Driven Interactive Safe Autonomous Driving*, 2022
- School of Engineering Fellowship, NYU Tandon School of Engineering, 2022
- China National University Student Innovation and Entrepreneurship Training Program, 2017–2019

PROFESSIONAL SERVICE

Journal reviewer: IEEE Transactions on Signal Processing; IEEE Transactions on Communications; IEEE Wireless Communications Letters; IEEE Transactions on Vehicular Technology; IEEE Vehicular Technology Magazine; IEEE Control Systems Letters.

Conference reviewer: IEEE ICC 2026; IEEE INFOCOM 2025; IEEE GLOBECOM 2025; IEEE CDC 2025; IEEE ICRA 2024; ACC 2024.
